82mm (3 1/8")

the new (460cc)

The **LIGNUM TEE** is not comparable to any quality wood or PVC so far, because of its unique production process and the used elements. For the LIGNUM TEE wood and plant materials, polymers and natural glue are used. The elements are cut into micro particles and the micro granules are formed by jet molding machines to an ingenious golf tee and this is why the new LIGNUM TEE is more durable but yet biodegradable. This is also the reason why greenkeepers are very much in favour of the new LIGNUM TEE compare to PVC tees.

MORE THAN 3.000.000 GOLFERS USE THE LIGNUM TEE

LIGNUMTM

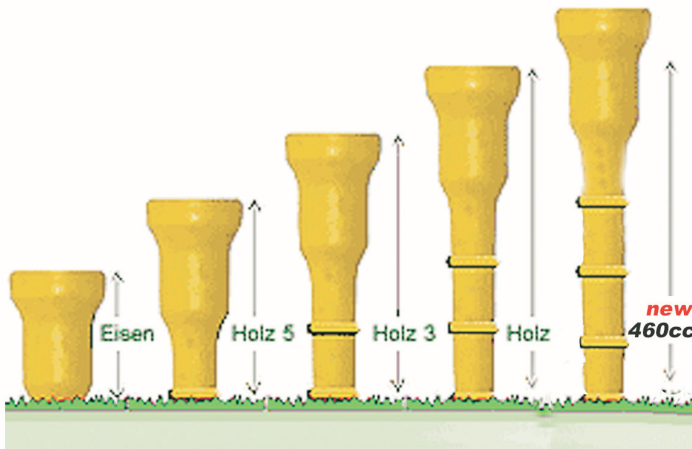

For LIGNUM golf tees we use wood and plant materials, polymers and natural glue

Main advantages:

- innovative material
- perfect swing control
- graduated distance tee
- available in different lengths
- higher durability
- environmentally friendly,
- no damage to your grass maintenance machinery
- competitive pricing

Exact ball height control due to the distance rings

Lignum Tee

The different lengths – 53mm standard tee, 62mm & 72mm for irons and woods and the new 82mm for the biggest drivers – and the embedded steps for height control give the golf player the perfect swing control while the innovative material gives the tee a higher durability, more flexibility and causes no damage to the grass maintenance machinery.

53 mm (2 1/8") Lignum Tees come with 20-tees in the poly bag

62 mm (2 1/2") Lignum Tees come with 16-tees in the poly bag

72 mm (2 3/4") Lignum Tees come with 12-tees in the poly bag

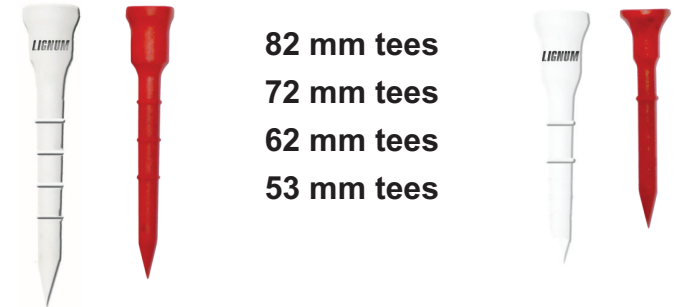

82 mm (3 1/8") Lignum Tees come with 10-tees in the poly bag
